

Aeronautics and the Environment

The Aeronautics Sector chooses **Aero3A** to strengthen its Environmental Communication

Agency Aero3A has just won the CORAC Research Council for Civil Aviation's invitation to tender to bring a new dimension to the French aeronautical world's communication of research, environmental and sustainable development issues.

A COMMITMENT BACKED BY AN ENTIRE PROFESSION

CORAC federates the **entire French aeronautical industry** with AIRBUS, Dassault Aviation, EADS, SAFRAN, Thales and the **GIFAS** association, **airlines** with Air France and the FNAM National Federation of Merchant Aviation, **airports in France** with ADP *Aéroports de Paris* and the UAF Union of French Airports, as well as **ONERA** the French Aerospace Lab, **DGA** French Arms Procurement Agency, **DGAC** French Civil Aviation Authority and the French Ministries of Ecology, Energy, Durable Development and the Sea; Higher Education and Research; and Economy, Employment and Industry.

Thanks to its experience and network, Aero3A will be presenting an entire profession's commitment to greatly improving the environmental performance of air transport by 2020. First step: the creation of a CORAC website by Aero3A (with its partner Activ'Company) at the beginning of 2010.

*Established in 2006 by **Frédéric Aragon**, Aero3A is an information and communication agency specialising in the Aviation/Space, Defence/Security and Environmental sectors. Based in Paris, the agency relies on a network of experts in 35 countries.*

*Some of Aero3A's other clients include **ASD, ALCAN Aerospace, Défense Conseil International, Eurocopter, MBDA, SAAB Aerospace, SOGITEC, GIFAS, the Paris Air Show, EXPONAVAL-Santiago, the Chinese Province of Heilongjiang, the Russian oblast of Ulyanovsk and the Armed Forces of the United Arab Emirates** ■*
